

# Retail Sales Performance Analysis

## Executive Business Intelligence Report

Prepared by: Winfred Namuwaya

SQL | Power BI | Excel | DAX

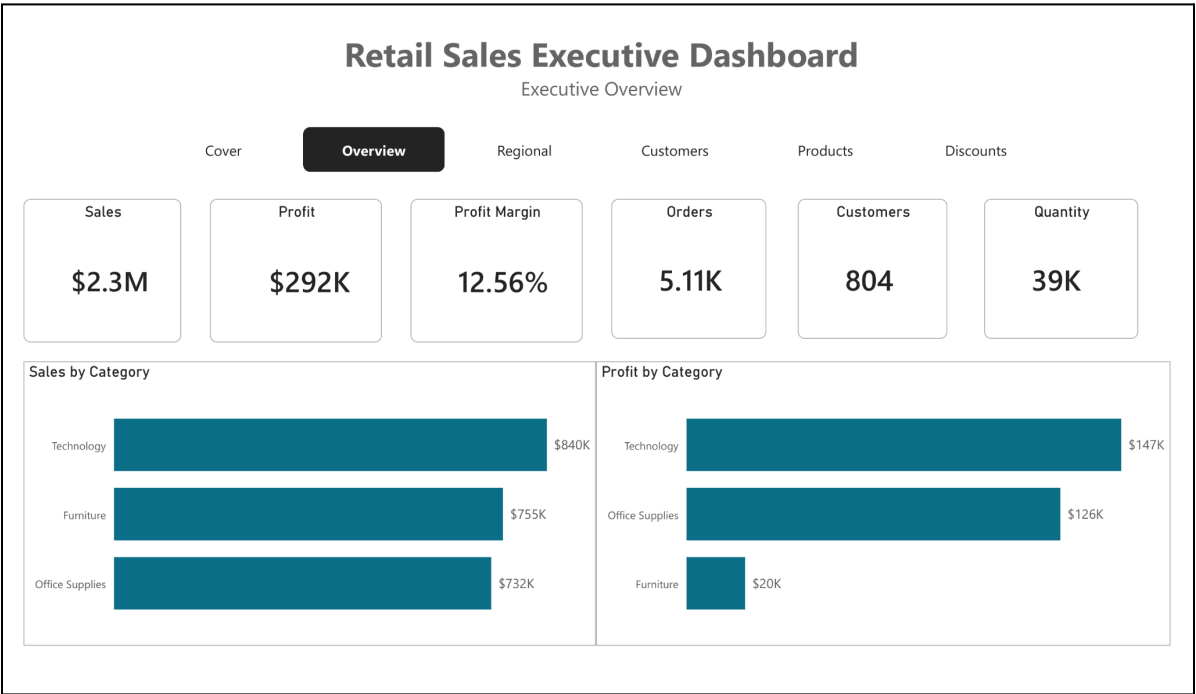

### Executive Summary

This report summarizes analysis of 10,194 retail transactions. The business generated \$2.33M in sales and \$292K in profit. The analysis found that aggressive discounting reduced profitability despite strong sales, while the West region and Technology category consistently outperformed others.

| Sales   | Profit | Margin | Orders | Customers |
|---------|--------|--------|--------|-----------|
| \$2.33M | \$292K | 12.56% | 5,111  | 804       |

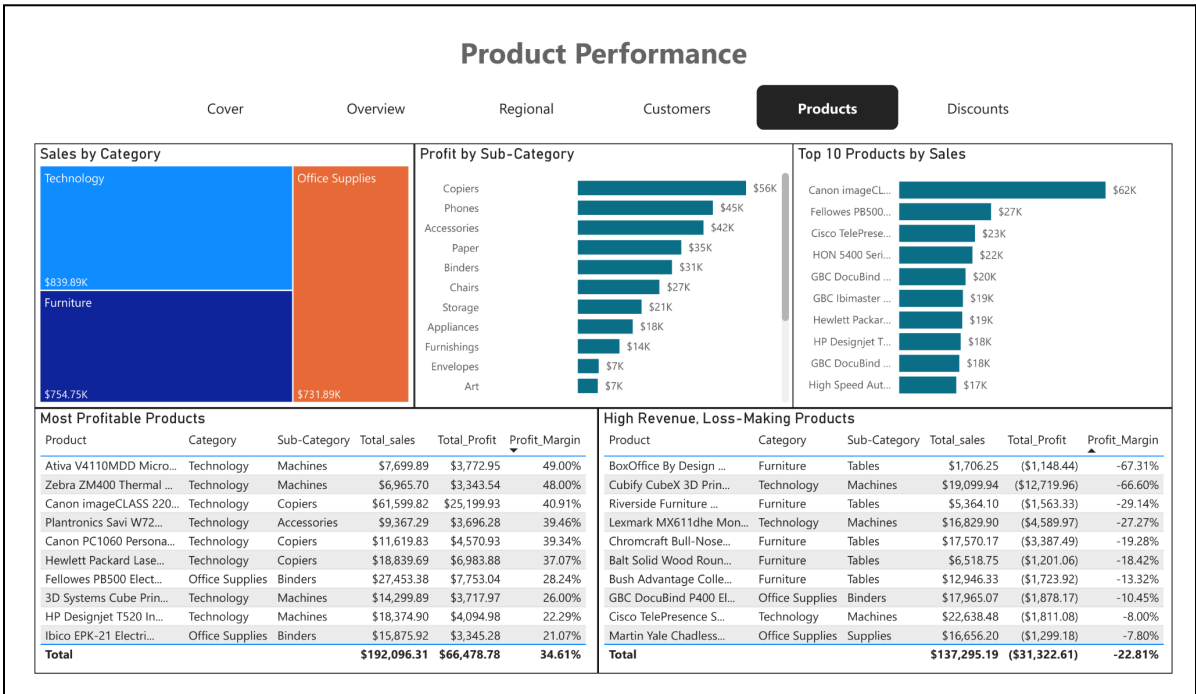

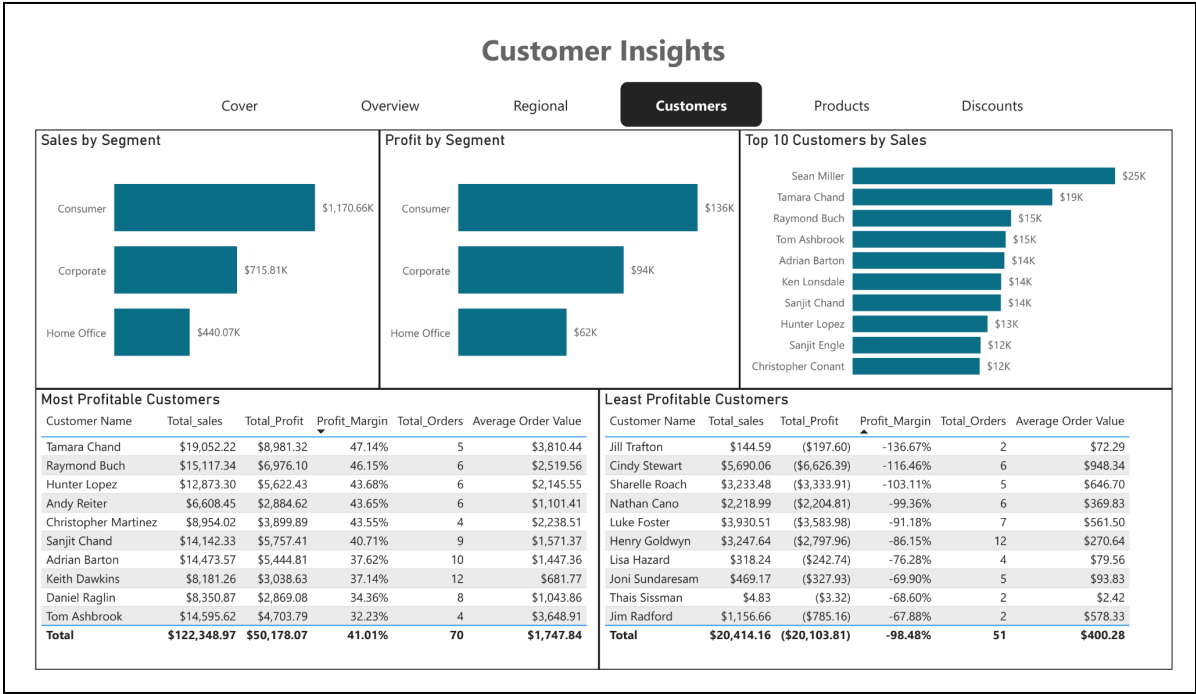

# Executive Overview & Regional Performance

Executive KPIs and regional trends are shown below.

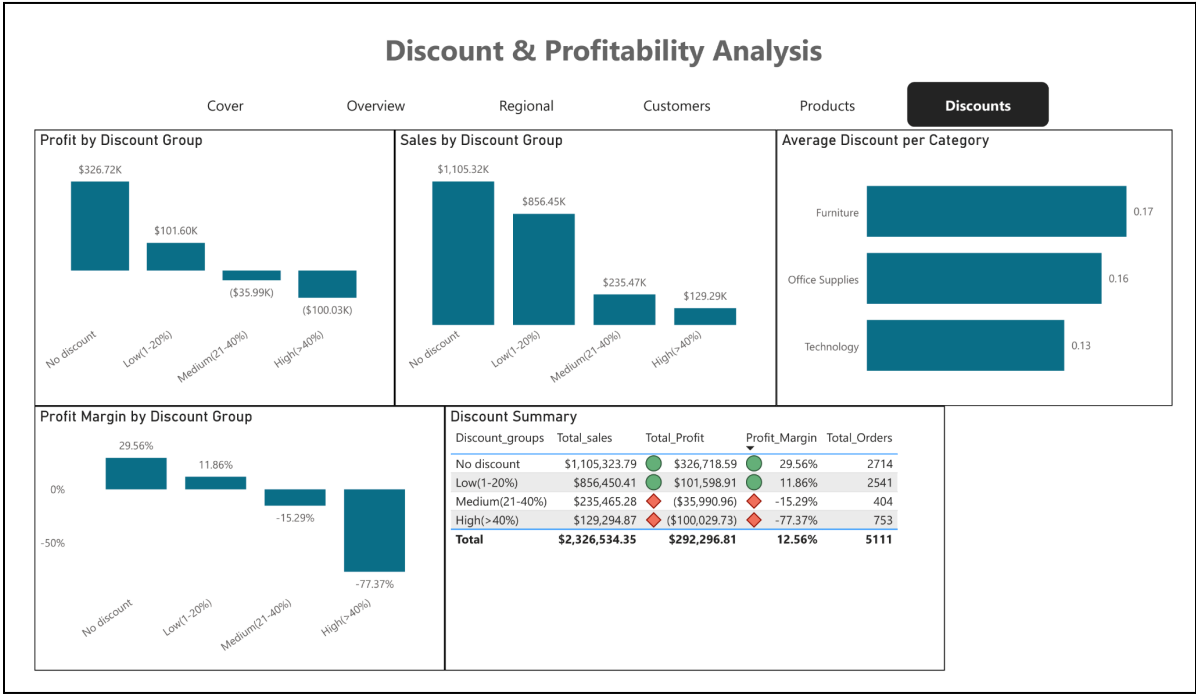

# Customer & Product Insights

Consumer customers drove the largest sales while Technology led profitability. Furniture contained several high-revenue but loss-making products.

# Discount & Profitability Analysis

Medium and high discounts produced negative profit margins, making discount strategy the most important improvement opportunity.

## **Recommendations & Conclusion**

- Reduce medium and high discounts.
- Review pricing for Tables and Bookcases.
- Expand Home Office marketing.
- Replicate West region best practices.
- Review seasonal promotions in November.

## **Workflow**

Excel → SQL → Power BI → DAX → Dashboard → Business Recommendations

## **Conclusion**

The project demonstrates end-to-end business intelligence, from data preparation to actionable recommendations, and provides management with insights to improve profitability and long-term performance.
